Program Description

Program Overview

Program Name

Training of Caregivers for Children with Noma in Burkina Faso

- 2 Diseases program aims to address
- Non-Communicable Disease Care, General
- Beneficiary population
- Age groups: Children (under 5 yrs), Adolescents (5-14 yrs)
- · Genders: All genders
- •Special populations: People with low income, Rural populations
- 4 Countries
- Burkina Faso

Program start date

November 19, 2018.

6 Anticipated program completion date

November 1, 2021.

8 Program summary

Called "the face of poverty", noma is a gangrenous condition that begins as a benign lesion of the mouth, then quickly destroys a part of the face. This disease occurs in a context of extreme poverty, malnutrition and health problems.

This program aims at raising awareness of the disease, increasing the understanding around the after-effects of noma and improving healthcare delivery (conducting a physiotherapeutic assessment and offering rehabilitation to children impacted by this disease). To that end, in August 2019, a member of the PhysioNoma organization (a well-known organization with expertise in the field of noma) trained three nurses, the administrative manager, an animator and the cook of the local NGO Sentinelles. During this mission a dozen patients were able to benefit from these new skills.

Program Strategies & Activities

9 Strategies and activities

Strategy 1: Health Service Strengthening

ACTIVITY	DESCRIPTION
Training	The PhysioNoma team provided training to the NGO Sentinelles in Burkina Faso for them to better understand the effects of noma, conduct a physiotherapeutic assessment and offer rehabilitation.
Funding	The Mécénat Servier funded the PhysioNoma organization, in order for them to train members of the NGO Sentinelles in Burkina Faso on how to care for Noma patients.

Strategy by country

STRATEGY	COUNTRY

Health Service Strengthening	Burkina Faso

Companies, Partners & Stakeholders

COMPANY	ROLE
Servier	Servier funds the training of the care team of the NGO Sentinelles in the rehabilitation from the after-effects of Noma disease.

12 Funding and implementing partners

PARTNER	ROLE/URL	SECTOR
La Chaîne de l'Espoir	Created in January 2003, PhysioNoma is an association that works for the rehabilitation of NOMA sequelae. It brings together physiotherapists and speech therapists, students and professionals, motivated to: *Train the care teams on site, in order to allow a long-term therapeutic follow-up and a discussion of the proposed rehabilitative techniques, *Implementing the rehabilitation of noma victims, in collaboration with the host NGOs and surgeons' associations in Africa and Europe, *To inform the medical and paramedical professions about the issue of noma in Europe. A member of the PhysioNoma Organization provided training to members of the local NGO Sentinelles for them to better understand the noma disease and how to care for patients and rehabilitate them. https://www.physionoma.fr	Voluntary
Sentinelles	Created in 1980, the principal objective of the Foundation is to search for, discover and provide immediate help for profoundly wounded human beings, children, women and men, met in the depths of their suffering. In Burkina Faso, children are received in their reception center where they receive adequate care to allow their rehabilitation. https://www.sentinelles.org/?language=en	Voluntary

Local Context, Equity & Sustainability

15 Local health needs addressed by program

Called "the face of poverty", noma is a gangrenous condition that begins as a benign lesion of the mouth, then quickly destroys a part of the face. This disease occurs in a context of extreme poverty, malnutrition and health problems and is mainly found in children under the age of 10. Without adequate care, noma disease kills some 90% of patients affected (WHO - Regional Office for Africa).

To tackle this disease, this program works with both an international NGO (PhysioNoma) which has a lot of experience with noma disease and a local NGO which has a high understanding of the local situation and the needs in the given country.

How needs were assessed

The needs were assessed by the local NGO (Sentinelles).

Formal needs assessment conducted

No.

Social inequity addressed

[No response provided]

Local policies, practices, and laws considered during program design

[No response provided]

How diversion of resources from other public health priorities is avoided

[No response provided]

Local Context, Equity & Sustainability

Program provides health technologies (medical devices, medicines, and vaccines)
 No.
 Health technologies are part of local standard treatment guidelines
 N/A.

41 Health technologies are covered by local health insurance schemes

N/A.

22 Program provides medicines listed on the National Essential Medicines List

N/A.

Sustainability plan

[No response provided]

Additional Program Information

24 Additional program information

[No response provided]

Potential conflict of interest discussed with government entity

[No response provided]

Access Accelerated Initiative participant

Yes.

International Federation of Pharmaceutical Manufacturers & Associations (IFPMA) membership

Yes.

Program Indicators

Appendix

This program report is based on the information gathered from the Access Observatory questionnaire below.

Program Description

PROGRAM OVERVIEW

- **Program Name**
- Diseases program aims to address:

Please identify the disease(s) that your program aims to address (select all that apply).

Beneficiary population

Please identify the beneficiary population of this program (select all that apply).

Countries

Please select all countries that this program is being implemented in (select all that apply).

- **Program Start Date**
- **Anticipated Program Completion Date**
- Contact person

On the public profile for this program, if you would like to display a contact person for this program, please list the name and email address here (i.e. someone from the public could email with questions about this program profile and data).

Program summary

Please provide a brief summary of your program including program objectives (e.g., the intended purposes and expected results of the program; if a pilot program, please note this). Please provide a URL, if available. Please limit replies to 750 words.

PROGRAM STRATEGIES & ACTIVITIES

9 Strategies and activities

Based on the BUSPH Taxonomy of Strategies, which strategy or strategies apply to your program (please select all that apply)?

Strategy by country

If you have registered one program for multiple countries, this question allows you to provide a bit more specificity about each country (e.g. some countries have different strategies, diseases, partners, etc.). Please complete these tables as applicable. For each portion you have you selected from above (program strategies), please identify which country/countries these apply.

COMPANIES, PARTNERS AND STAKEHOLDERS

Company roles

Please identify all pharmaceutical companies, including yours, who are collaborating on this program:

What role does each company play in the implementation of your program?

12 Funding and implementing partners

Please identify all funding and implementing partners who are supporting the implementation of this program (Implementing partners is defined as either an associate government or non-government entity or agency that supplements the works of a larger organization or agency by helping to carry out institutional arrangements in line with the larger organization's goals and objectives.)

- a. What role does each partner play in the implementation of your program? Please give background on the organization and describethenature of the relationship between the organization and your company. Describe the local team's responsibilities for the program, with reference to the program strategies and activities. (response required for each partner selected).
- b. For each partner, please categorize them as either a Public Sector, Private Sector, or Voluntary Sector partner. (Public Sector is defined as government; Private Sector is defined

as A business unit established, owned, and operated by private individuals for profit, instead of by or for any government or its agencies. Generation and return of profit to its owners or shareholders is emphasized; Voluntary Sector is defined as Organizations whose purpose is to benefit and enrich society, often without profit as a motive and with little or no government intervention. Unlike the private sector where the generation and return of profit to its owners is emphasized, money raised or earned by an organization in the voluntary sector is usually invested back into the community or the organization itself (ex. Charities, foundations, advocacy groups etc.))

c. Please provide the URL to the partner organizations' webpages

Funding and implementing partners by country

If you have registered one program for multiple countries, this question allows you to provide a bit more specificity about each country (e.g., some countries have different strategies, diseases, partners, etc.). Please complete these tables as applicable. For each portion you have you selected from above (funding and implementing partners), please identify which country/countries these apply.

Stakeholders

Please describe how you have engaged with any of these local stakeholders in the planning and/or implementation of this program. (Stakeholders defined as individuals or entities who are involved in or affected by the execution or outcome of a project and may have influence and authority to dictate whether a project is a success or not (ex. Ministry of Health, NGO, Faith-based organization, etc.). Select all that apply.

Government, please explain
Non-Government Organization (NGO), please explain
Faith-based organization, please explain
Commercial sector, please explain
Local hospitals/health facilities, please explain
Local universities, please explain
Other, please explain

LOCAL CONTEXT, EQUITY & SUSTAINABILITY

Local health needs addressed by program

Please describe how your program is responsive to local health needs and challenges (e.g., how you decided and worked together with local partners to determine that this program was appropriate for this context)?

- How were needs assessed
- b Was a formal need assessment conducted (Yes/No) If yes, please upload file or provide URL.

16 Social inequity addressed

Does your program aim to address social inequity in any way (if yes, please explain). (Inequity is defined as lack of fairness or justice. Sometime 'social disparities,' 'structural barriers' and 'oppression and discrimination' are used to describe the same phenomenon. In social sciences and public health social inequities refer to the systematic lack of fairness or justice related to gender, ethnicity, geographical location and religion. These unequal social relations and structures of power operate to produce experiences of inequitable health outcomes, treatment and access to care. Health and social programs are often designed with the aim to address the lack of fairness and adjust for these systematic failures of systems or policies.*)

*Reference: The definition was adapted from Ingram R et al. Social Inequities and Mental Health: A Scoping Review. Vancouver: Study for Gender Inequities and Mental Health, 2013.

Local policies, practices, and laws considered during program design

How have local policies, practices, and laws (e.g., infrastructure development regulations, education requirements, etc.) been taken into consideration when designing the program?

18 How diversion of resources from other public health priorities is avoided

Please explain how the program avoids diverting resources away from other public health priorities? (e.g. local human resources involved in program implementation diverted from other programs or activities).

19 Program provides health technologies

Does your program include health technologies (health technologies include medical devices, medicines, and vaccines developed to solve a health problem and improve quality of lives)? (Yes/No)

Health technology(ies) are part of local standard treatment guidelines

Are the health technology(ies) which are part of your program part of local standard treatment guidelines? (Yes/No) If not, what was the local need for these technologies?

Health technologies are covered by local health insurance schemes

Does your program include health technologies that are covered by local health insurance schemes? (Yes/No) If not, what are the local needs for these technologies?

Program provides medicines listed on the National Essential Medicines List

Does your program include medicines that are listed on the National Essential Medicines List? (Yes/No) If not, what was the local need for these technologies?

Sustainability plan

If applicable, please describe how you have planned for sustainability of the implementation of your program (ex. Creating a transition plan from your company to the local government during the development of the program).

ADDITIONAL PROGRAM INFORMATION

Additional program information

Is there any additional information that you would like to add about your program that has not been collected in other sections of the form?

Potential conflict of interest discussed with government entity

Have you discussed with governmental entity potential conflicts of interest between the social aims of your program and your business activities? (Yes/No) If yes, please provide more details and the name of the government entity.

25 Access Accelerated Initiative participant

Is this program part of the Access Accelerated Initiative? (Yes/No)

International Federation of Pharmaceutical Manufacturers & Associations (IFPMA) membership

Is your company a member of the International Federation of Pharmaceutical Manufacturers & Associations (IFPMA)? (Yes/No)

Program Indicators

INDICATOR DESCRIPTION

List of indicator data to be reported into Access Observatory database

For this program, activities, please select all inputs and impacts for which you plan to collect and report data into this database.

28 Data source

For this indicator, please select the data source(s) you will rely on.

29 Frequency of reporting

Indicate the frequency with which data for this indicator can be submitted to the Observatory.

- Data collection
- a. Responsible party: For this indicator, please indicate the party/parties responsible for data collection.
- b. Data collection Description: Please briefly describe the data source and collection procedure in detail.
- c. Data collection Frequency: For this indicator, please indicate the frequency of data collection.
- Data processing
- a. Responsible party: Please indicate all parties that conduct any processing of this data.
- b. Data processing— Description: Please briefly describe all processing procedures the data go through. Be explicit in describing the procedures, who enacts them, and the frequency of processing.
- c. Data processing Frequency: What is the frequency with which this data is processed?
- Data validation

Description: Describe the process (if any) your company uses to validate the quality of the data sent from the local team.

33 Challenges in data collection and steps to address challenges

Please indicate any challenges that you have in collecting data for this indicator and what you are doing to address those challenges.
